Hey Catalina Ambassadors,

Let’s draw together! We share our community with our friends and animals. Today we are going to draw a colorful flower so Anna’s Hummingbird can gather nectar.

When you are finished, take a picture and have an adult post it on Instagram. Be sure to tag the museum (@catalinamuseum) and use the hashtag: #catalinadraws

The Catalina Island Museum will feature your work on its website and Instagram.
Anna’s Hummingbird

The jewel colored Anna’s Hummingbird can be seen zooming all around the island! The male’s feathers are ruby and emerald, and the female is mostly emerald colored.

The hummingbirds eat nectar that they get from flowers with their long tongue.

Let’s use similes to describe Anna’s Hummingbird!

A simile compares two unlike things using as or like. Choose a picture to fill in the blank.

A hummingbird looks like a mini __________ as it zooms from flower to flower.

The hummingbird’s nest is as big a ______________.

The hummingbird’s egg is a small as a ____________.
